Determining Essential Core Competencies for Public Health Jobs

Determining Essential Core Competencies for Public Health Jobs: A Prioritization Process June 9, 2017

Public health organizations can be more effective when the competencies of their staff match the types of activities they do in their jobs. It is important that job descriptions include the competencies, in terms of both skills and knowledge, for success in a position. To become and remain accredited by the [Public Health Accreditation Board](#), health departments must provide job descriptions that include competencies. This is a good practice for all organizations and supports successful recruitment, hiring, and professional development.

Core Competencies for Public Health Professionals

The [Core Competencies for Public Health Professionals](#) (Core Competencies), a consensus set of skills for the broad practice of public health, as defined by the 10 Essential Public Health Services, offer health departments and other public health organizations a starting point for workforce development activities. Developed by the [Council on Linkages Between Academia and Public Health Practice](#), the Core Competencies reflect foundational skills desirable for professionals engaging in the practice, education, and research of public health. Widely applicable to the variety of jobs found within the public health field, the Core Competencies can be used for identifying competencies to be included in [competency-based job descriptions](#).

Purpose of This Tool

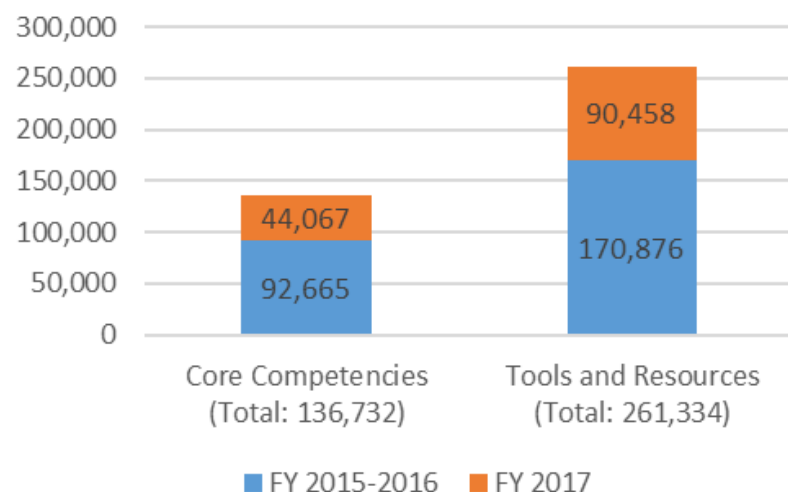

For any position, critical Core Competencies will vary depending on the responsibilities and
